

In late 2013, Internet Explorer® 11 was publicly released for Windows 7 and Windows 8. It is available for download at <http://windows.microsoft.com/en-us/internet-explorer/ie-11-worldwide-languages>. Rapattoni MLS is compatible with Internet Explorer® 10 and higher.

Starting April 4, 2014, Internet Explorer® 9 will no longer be supported by Rapattoni MLS. Note that Internet Explorer® 10 and Internet Explorer® 11 are only available on Windows 7 and Windows 8. Microsoft is not making Internet Explorer® 10 or 11 available for Windows Vista.

Rapattoni MLS will continue to support Windows Vista users on the current version of Mozilla Firefox® v27 and Google Chrome® v33. Mozilla Firefox® can be downloaded for free by visiting <http://www.mozilla.org/en-US/firefox/all/> and Google Chrome® can be downloaded for free by visiting <https://www.google.com/intl/en/chrome/browser/features.html>.

Upgrading to one of these supported browsers will result in a more secure and better performing platform for using and viewing the MLS. In addition to Internet Explorer® 10, Internet Explorer® 11, Mozilla Firefox® v27, and Google Chrome® v33, Rapattoni MLS is also compatible with Apple® Safari® 6.
